## PROFESSIONAL SUMMARY

Results-driven Business Analyst and Delivery Coordinator with 8+ years of experience delivering technology solutions at the intersection of healthcare, insurance, and PMO-led delivery environments. Currently engaged as Business Analyst / Delivery Coordinator supporting Salesforce consulting and digital transformation delivery at Blue Consulting. Deep domain expertise in health systems integration, insurtech platforms, and digital health transformation — including acting Service Delivery Manager responsibilities, leading a 7-member team and providing group-level operational support across 11 countries. Hands-on experience delivering Telehealth API migrations, multi-payer system integrations, and health insurance workflow automation. Proven track record driving 99.99% system uptime, 20%+ efficiency gains, and KES 2.2M+ in revenue impact. Skilled in translating complex business requirements into scalable technical solutions across Agile/Scrum, PMO governance, and ISO-compliant environments.

## SKILLS

- Delivery Coordination: PMO Liaison, RAID Log Management, Governance Reporting, Stakeholder Escalation
- Health Systems Integration: SmartInsure, Medismart, HAIS, HealthX, Curacel, Unisure
- Business Analysis: Requirements Elicitation, Functional Specifications, Use Cases, User Stories
- API & System Integration: REST APIs, EDI, Telehealth APIs, Multi-System Interoperability
- CRM & Platform Consulting: Salesforce (Consulting Engagement Exposure)
- Quality Assurance: UAT Design & Execution, Selenium, Postman, Test Protocols
- Methodologies: Agile, Scrum, Digital Transformation, Process Optimisation
- Monitoring Tools: Grafana, Prometheus
- Compliance: ISO 9001, ISO 27001, ISO 22301, QMS Documentation, SOP Development
- Stakeholder Management: Cross-functional Collaboration, Executive Reporting, Training Delivery
- Team Leadership: Service Delivery Management, Team of 7, Group-level Operations across 11 Countries
- Data & Reporting: Data Visualisation, KPI Tracking, Performance Reporting, Market Analysis

## WORK EXPERIENCE

### **Business Analyst / Delivery Coordinator | Blue Consulting** | Jul 2026 – Present

- Engaged as an independent Business Analyst / Delivery Coordinator supporting Salesforce consulting, implementation, and digital transformation delivery for client engagements coordinated through the company's PMO.
- Onboarding across delivery governance, reporting rituals, and stakeholder coordination structures; scope and deliverables aligned to client-facing project schedules.

### **Technical Service Lead & Acting Service Delivery Manager | Smart Applications International Ltd** | Apr 2024 – May 2025

- Acted as Service Delivery Manager, leading a team of 7 across technical and operations functions while providing group-level support across Smart's 11 countries of operation, overseeing service delivery standards, team performance, and cross-border operational alignment.
- Led end-to-end requirements gathering with stakeholders, translating complex health insurance business needs into clear functional specifications and user stories, driving a 20% improvement in implementation efficiency.
- Served as primary liaison between business and technical teams for SmartInsure and Medismart platforms, ensuring seamless communication and alignment across multi-disciplinary teams.
- Standardised UAT processes for SmartInsure, achieving 98% compliance with functional and non-functional requirements and reducing post-launch defects by 20%.
- Monitored post-implementation health system performance, identifying and resolving bottlenecks to improve system uptime by 25%.
- Tracked EDI performance, system downtime, bugs, and UAT findings, contributing to 99.99% system uptime across critical health insurance operations.
- Collaborated with service delivery unit to review and document all SOPs aligned with QMS guidelines, contributing to ISO 9001 certification in 2025.
- Facilitated stakeholder training sessions on health system platforms, achieving 90% end-user satisfaction and driving adoption of new digital workflows.
- Mentored junior analysts in requirements analysis and documentation, improving team delivery capacity by 15%.

- Championed ESG (Environmental, Social and Governance) initiatives as departmental ESG Champion, driving awareness and embedding responsible business practices across the service delivery function.
- Developed the departmental Enterprise Risk Management (ERM) risk register and key ERM components as Acting Service Delivery Manager, identifying, assessing, and mitigating operational risks in alignment with group risk frameworks.

#### **Technical Operations Analyst | Smart Applications International Ltd** | Jul 2024 – Mar 2025

- Supported multi-payer health system integrations and platform rollouts, achieving 95% on-time delivery through effective stakeholder coordination.
- Monitored health system availability using Grafana and Prometheus, maintaining 99.9% uptime for critical operations.
- Designed and executed UAT protocols using Selenium and Postman, achieving 100% compliance with quality standards prior to each release.
- Conducted system and data analysis to identify workflow inefficiencies, recommending enhancements that improved automation by 10%.
- Delivered training to 50+ internal and external health system users, boosting adoption rates by 85%.
- Contributed to internal audits and quality assurance aligned with ISO 9001 and ISO/IEC 27001 standards.

#### **Senior Customer Relations Officer | Smart Applications International Ltd** | Apr 2024 – Jul 2024

- Compiled and analysed customer insights to generate executive reports, identifying service optimisation opportunities across health insurance accounts.
- Managed change requests and led business process improvements, enhancing customer retention and seamless execution of transformation initiatives.
- Collaborated with cross-functional teams to resolve issues within SLA timelines, improving customer satisfaction metrics.

#### **Customer Relations Officer / Key Accounts Manager | Smart Applications International Ltd** | Apr 2019 – Apr 2024

- Managed key health insurance customer relationships, identifying business needs, upselling solutions, and driving retention through data-driven engagement.
- Developed executive-level reports and presentations analysing customer performance metrics and recommending strategic improvements.
- Created comprehensive user guides and led virtual and in-person training sessions, enhancing product adoption across health system platforms.
- Conducted competitive analysis to identify market trends and drive data-backed business strategies.

#### **Business Development Officer | Postbank, Kericho County** | Sep 2018 – Mar 2019

- Built and strengthened stakeholder relationships, driving long-term customer retention and revenue growth.
- Conducted in-depth market research to identify business opportunities and support strategic decision-making.
- Led presentations and negotiations with potential investors, securing strategic partnerships and expanding market reach.

#### **IT Support Engineer & System Implementor | Endeavour Africa Limited** | Feb 2017 – Aug 2018

- Implemented and optimised IT systems by configuring hardware, software, and applications to enhance operational efficiency.
- Provided technical support and troubleshooting, ensuring minimal system downtime.
- Collaborated with cross-functional teams to ensure seamless system integration and improved user adoption.

## **KEY PROJECTS**

---

#### **Telehealth API V1 to V2 Migration | Jul 2024 – Feb 2025**

Managed end-to-end migration of Telehealth API, ensuring data privacy compliance and enhanced system performance for seamless healthcare operations across payer and provider networks.

#### **Multi-System Integration Project (HAIS, HealthX, Pensoft, Unisure, E02-Smart) | May 2025**

Oversaw integration of five distinct health and insurance platforms, ensuring seamless interoperability and operational efficiency across the ecosystem.

#### **CIC MEDIPAL Mobile Health Application | Jan – Dec 2021**

Led development and implementation of a user-centric mobile healthcare solution, generating KES 2.2 million in direct revenue and improving patient access to health services.

#### **Smart Virtual Access Migration (Medismart) | Jan – Dec 2023**

Led migration of all payers to Virtual Access within Medismart, achieving 100% member transition through parallel changeover, comprehensive user training, and robust bug tracking.

#### **DEFMIS Project — MS Navision & Curacel Integration | Mar 2025**

Overseeing integration of MS Navision and Curacel, streamlining operational workflows and improving financial accuracy across health insurance operations.

#### **Inua Jamii Verification Automation (Postbank) | Sep 2018 – Mar 2019**

Automated verification of Inua Jamii government health stipend beneficiaries in Bomet County, ensuring programme integrity and eliminating fraudulent claims.
